SIERRA SOFTWARE

More than 30 years of experience creating software tools for the embroidery business.

User Interface and Views

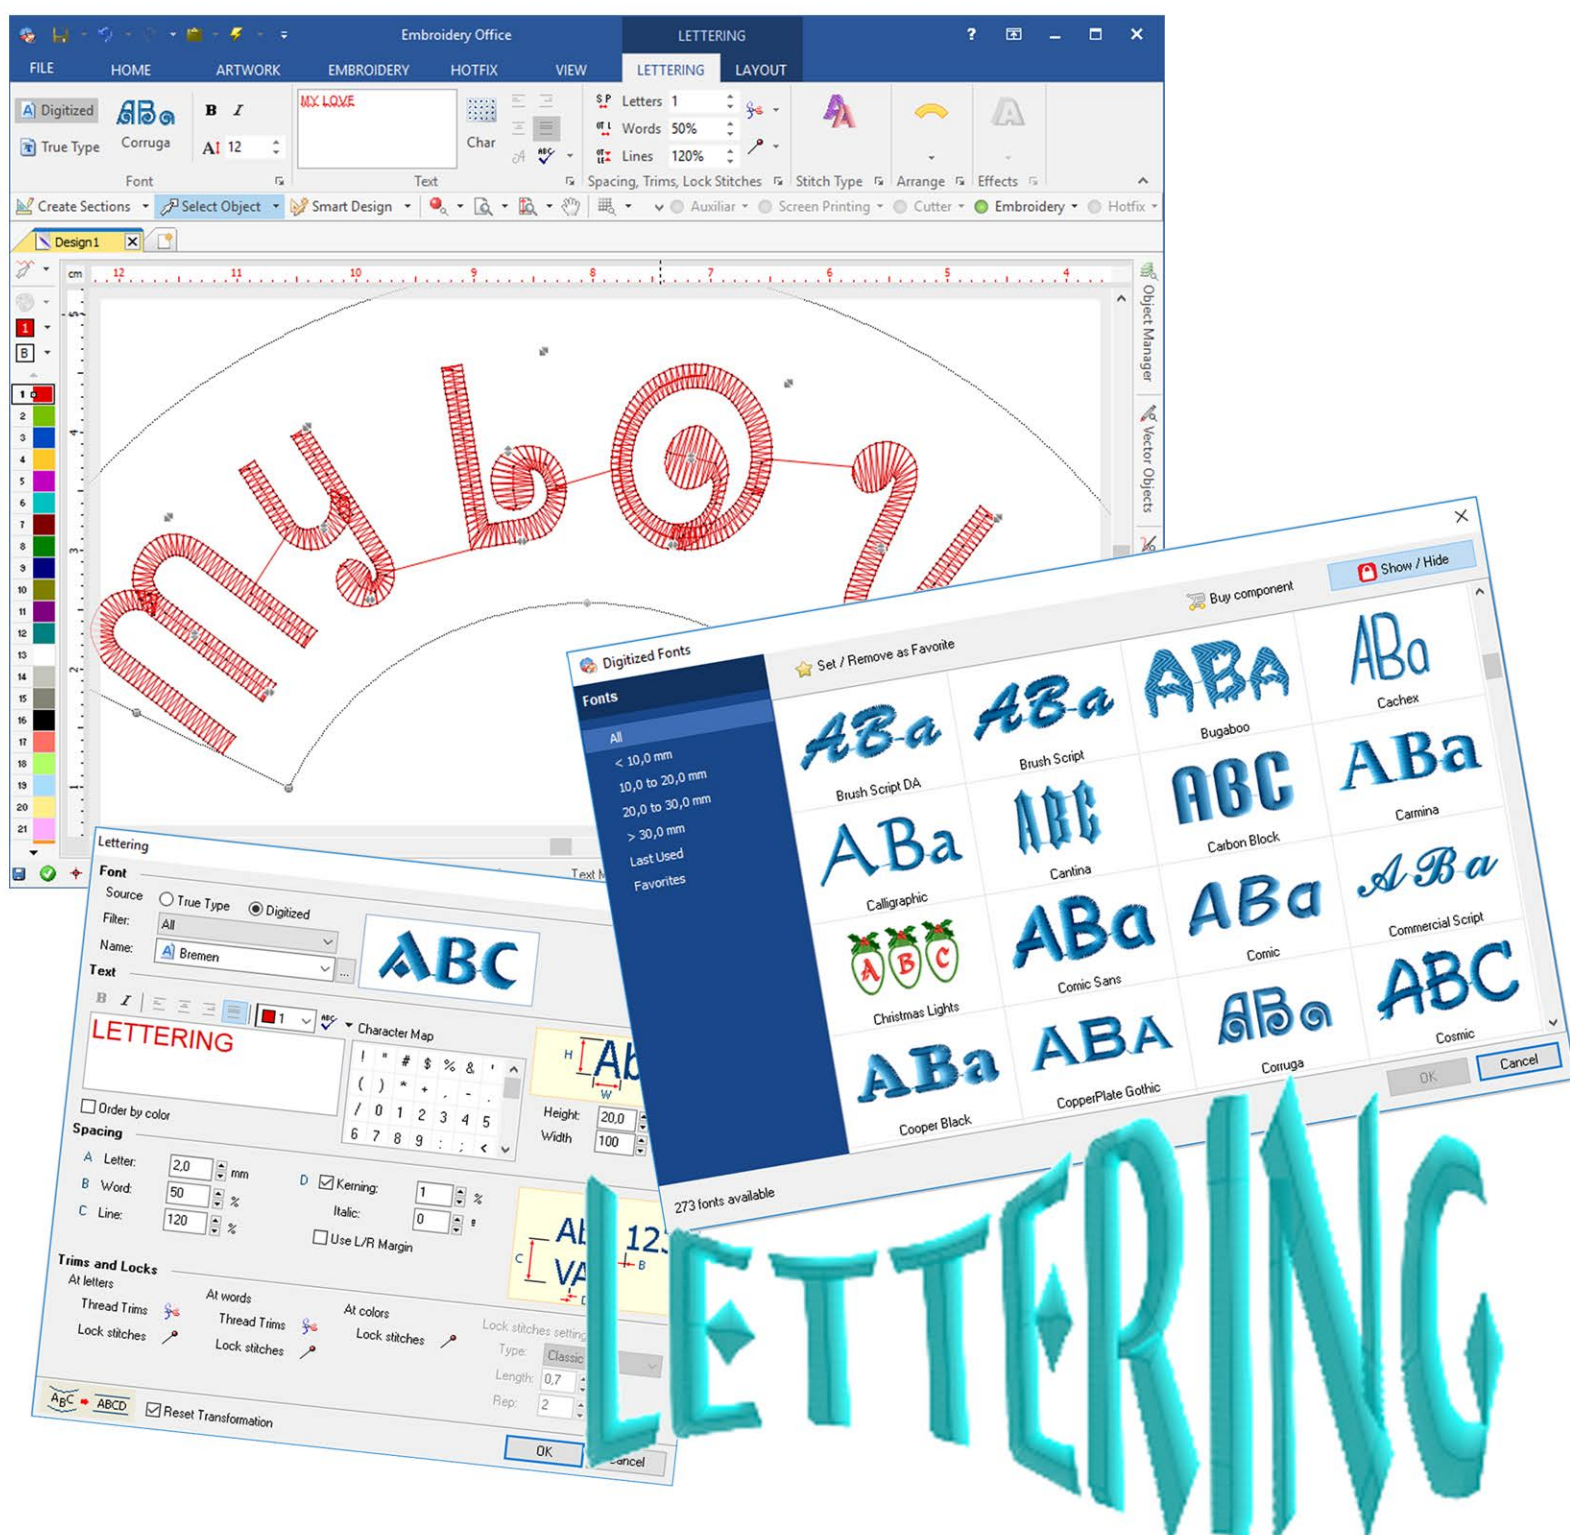

The most beautiful and productive tool we have ever developed.

Included in the most beautiful and popular user interface, this product offers several ways to create designs according to your preference.

Well organized toolset and many optional synchronized views (that you can show or hide) help you to create amazing designs and edit existing designs with ease.

Objects, Blocks & Stitches Editing

Created designs can be fully edited within this single application. It refers to both embroidery objects, vector objects and raster images (no need to switch to other applications).

Object Editing: Users can change shapes, fill styles, components, object properties and elements.

Block Editing: Users can change the size and position and the sequence of objects or blocks.

Stitch Editing: Users can edit each stitch of the design or a group of stitches (Stitch Editing)

FEATURES	D50	D60	D80
Object Editing			
Modify Wireframe and other Geometric Elements	✓	✓	✓
Modify Fill Style and other Fill Properties	✓	✓	✓
Modify Quality Adjustments	✓	✓	✓
Change Objects Sequence	✓	✓	✓
Block Editing			
Move, Scale, Rotate and Mirror Object or Blocks	✓	✓	✓
Cut, Copy, Paste and Duplicate Object or Blocks	✓	✓	✓
Group/Ungroup Objects	✓	✓	✓
Branch Objects	✓	✓	✓
Stitch Editing			
Stitch by Stitch Editing (move, add, delete)	✓	✓	✓
Select Block of Stitches, Envelope Transformation	✓	✓	✓
Convert Stitches to Objects (expanded to condensed)	✓	✓	✓
Stitch Effects: Globe, Lens, Noise, Speed, etc	✓	✓	✓

Digitizing

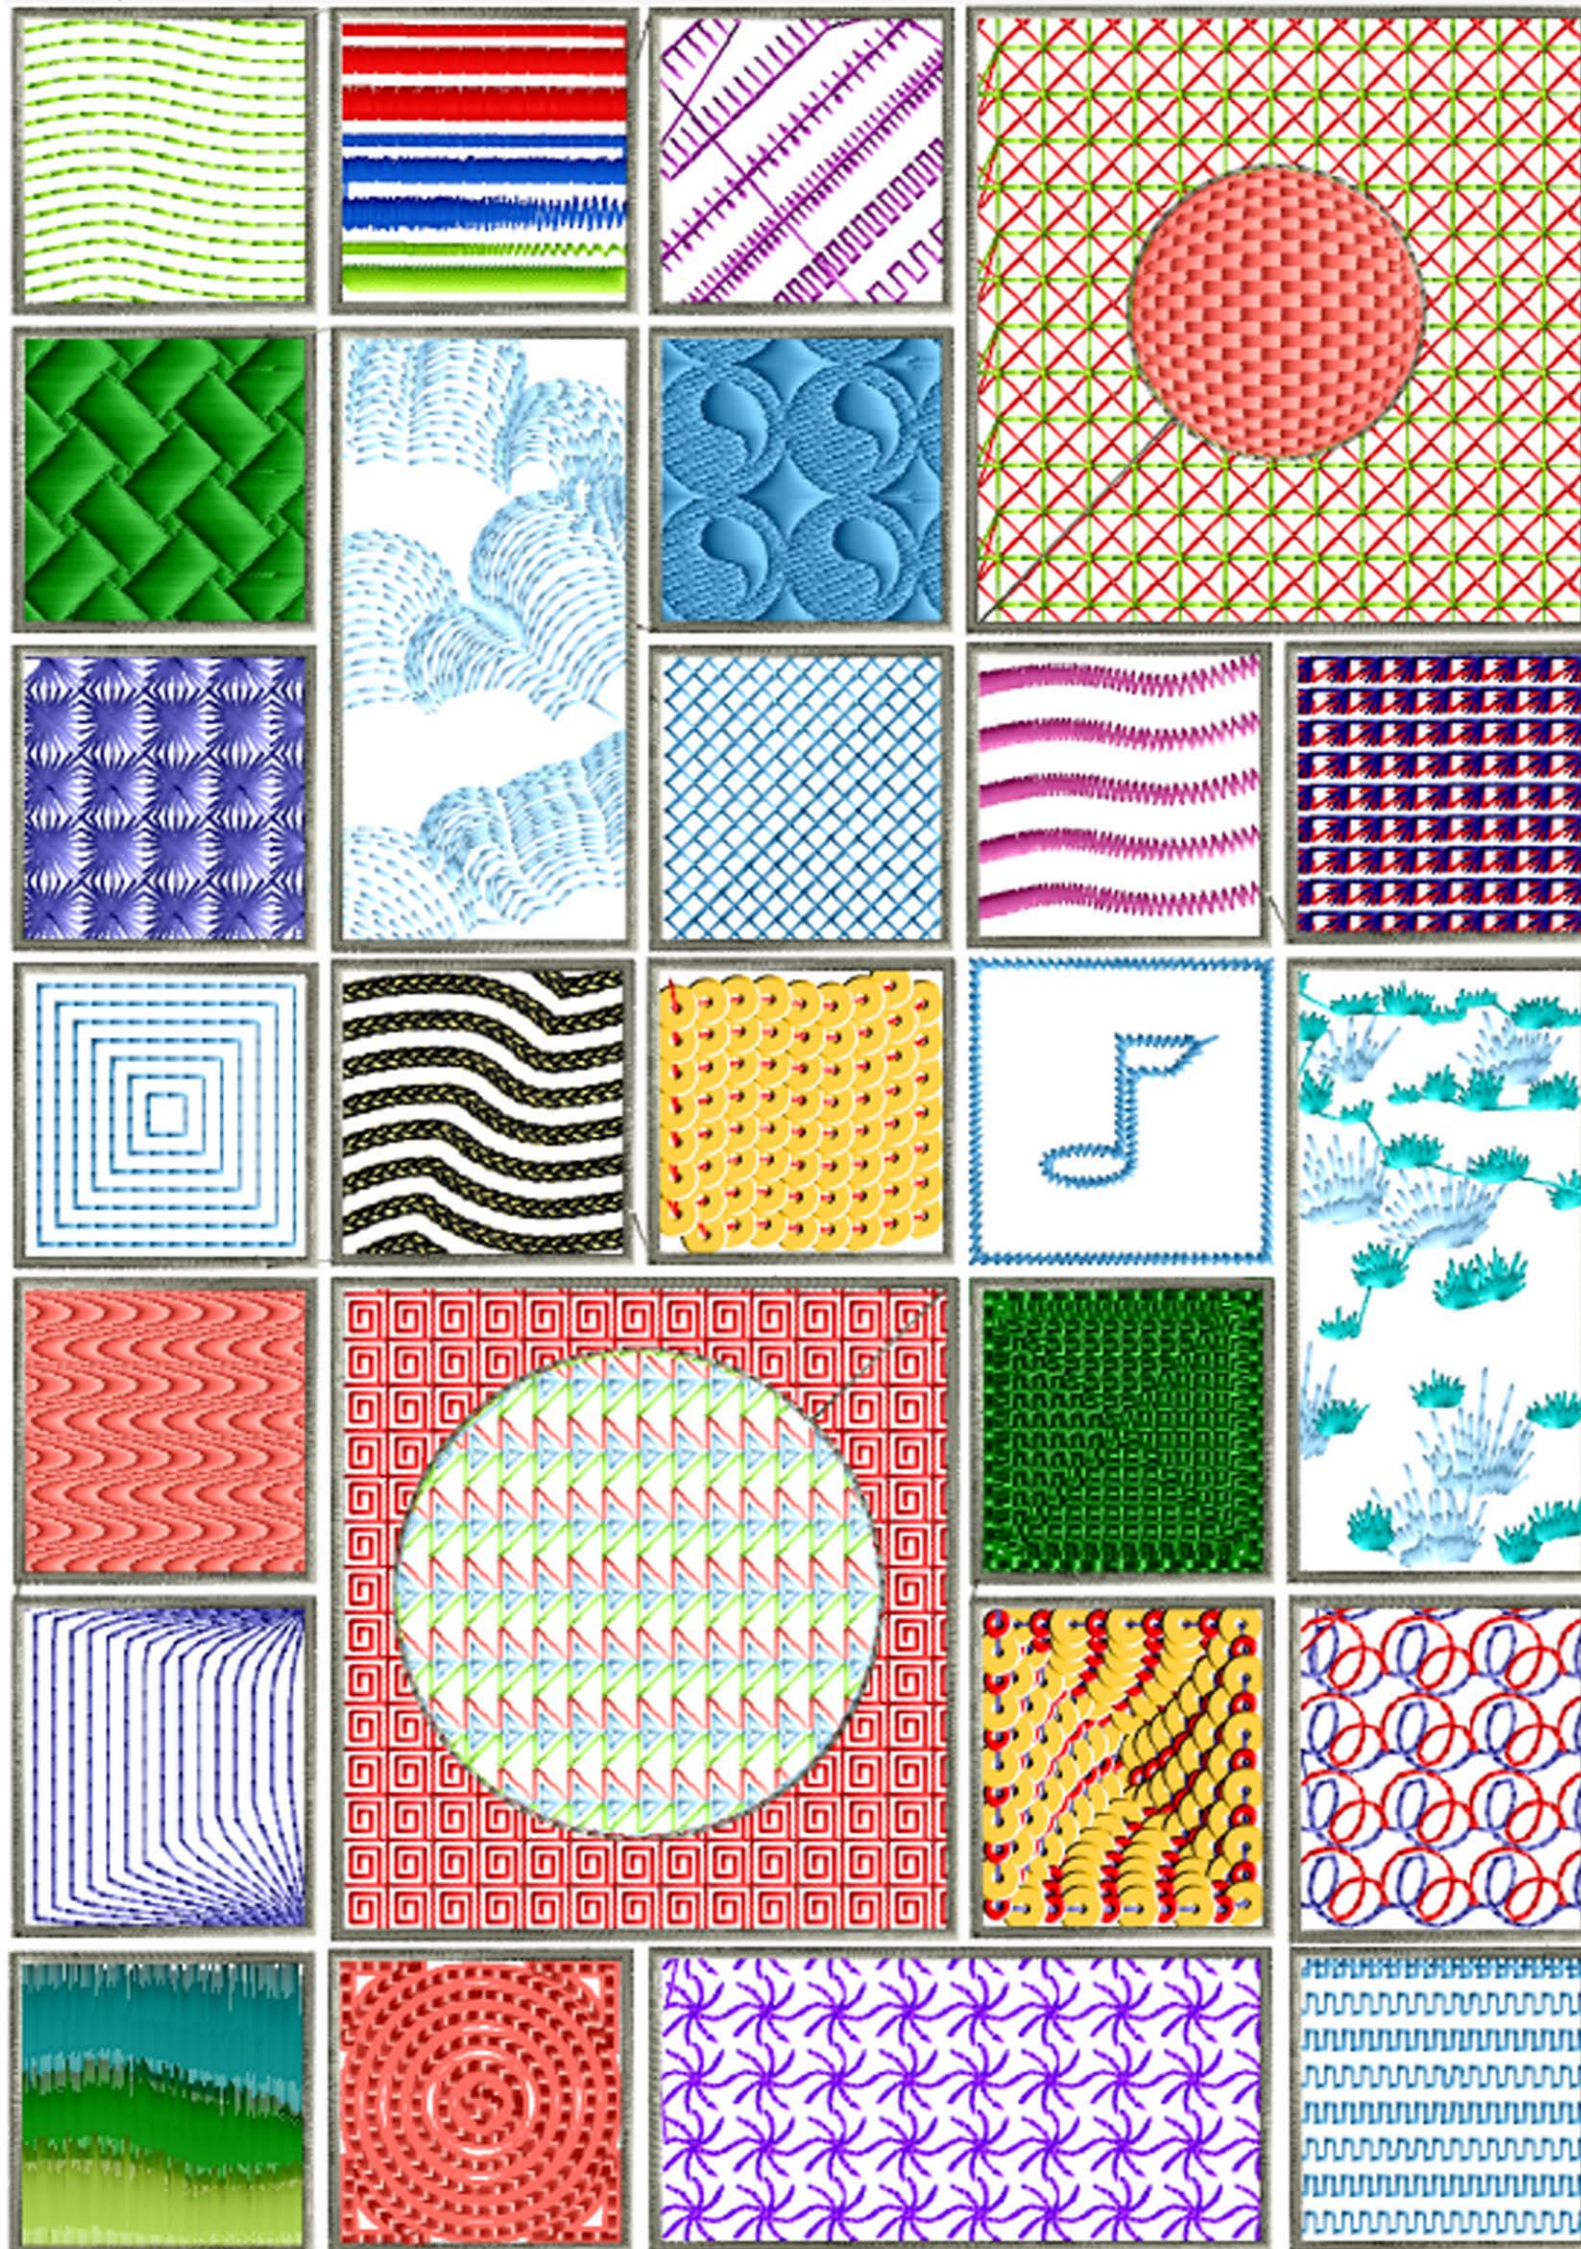

All Invented Digitizing Options!

Embroidery Office offers more than the required digitizing methods, whether the artwork comes from vector files, raster images, photo pictures or from external graphic applications.

Embroidery Office includes now the SmartDesign tool to accelerate the design creation and editing process. It can create amazing objects with a simple click.

FEATURES	D50	D60	D80
Digitizing Modes / Objects Input Methods

Auto-Digitizing Modes			
Pattern Fills Only	✓	✓	✓
Running Stitch, ZigZag & Pattern Fills	✓	✓	✓
Photo-Stitching (B&W + Color)	✓	✓	✓
Cross Stitch	✓	✓	✓

Fill Styles

More tools than you'll ever use.

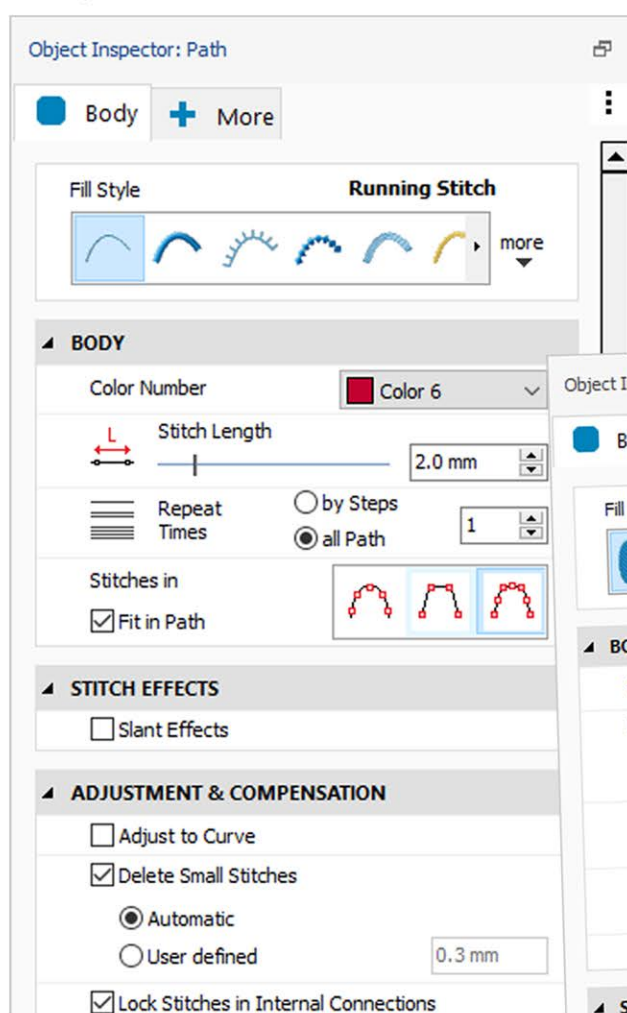

This product offers a huge variety of stitches fill styles for each embroidery object.

Each style can be customized to produce an unlimited number of beautiful stitches fill effects.

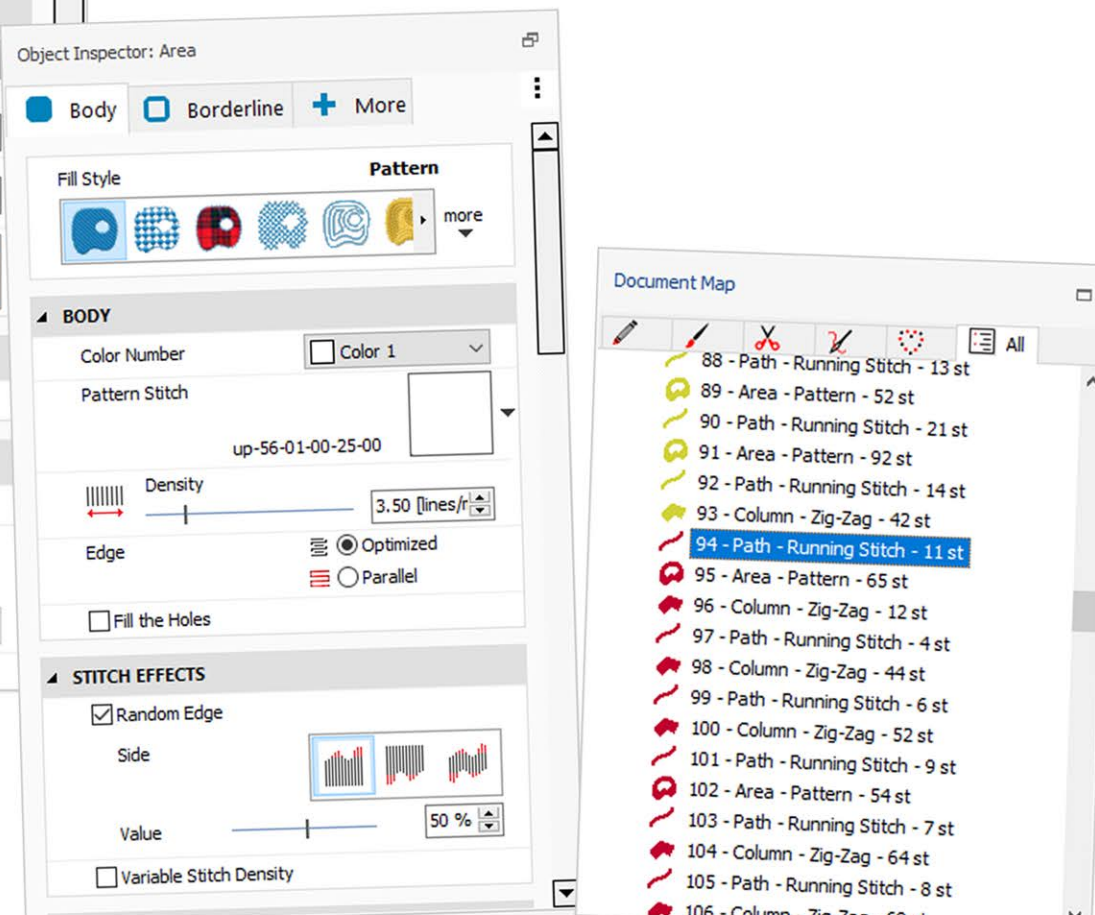

Choose your favorite style for lines and areas, and personalize it (change the pattern, density, stitch length, etc) to produce amazing objects.

You can also edit the material compensation adjustments (underlay stitches, short stitches, pull compensation, etc).

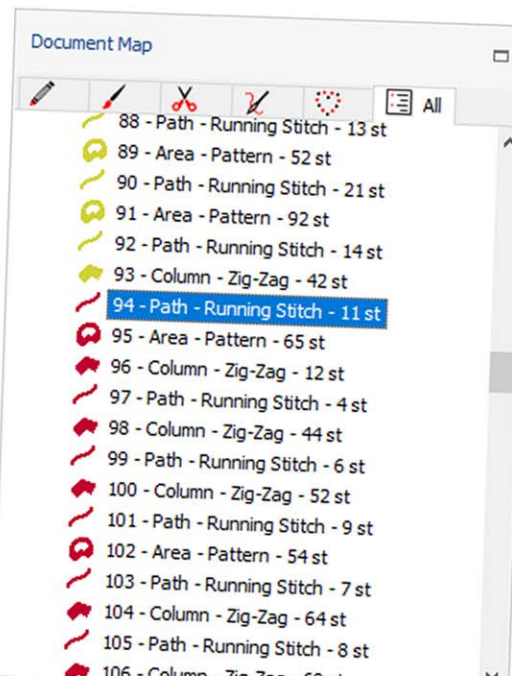

Object Inspector

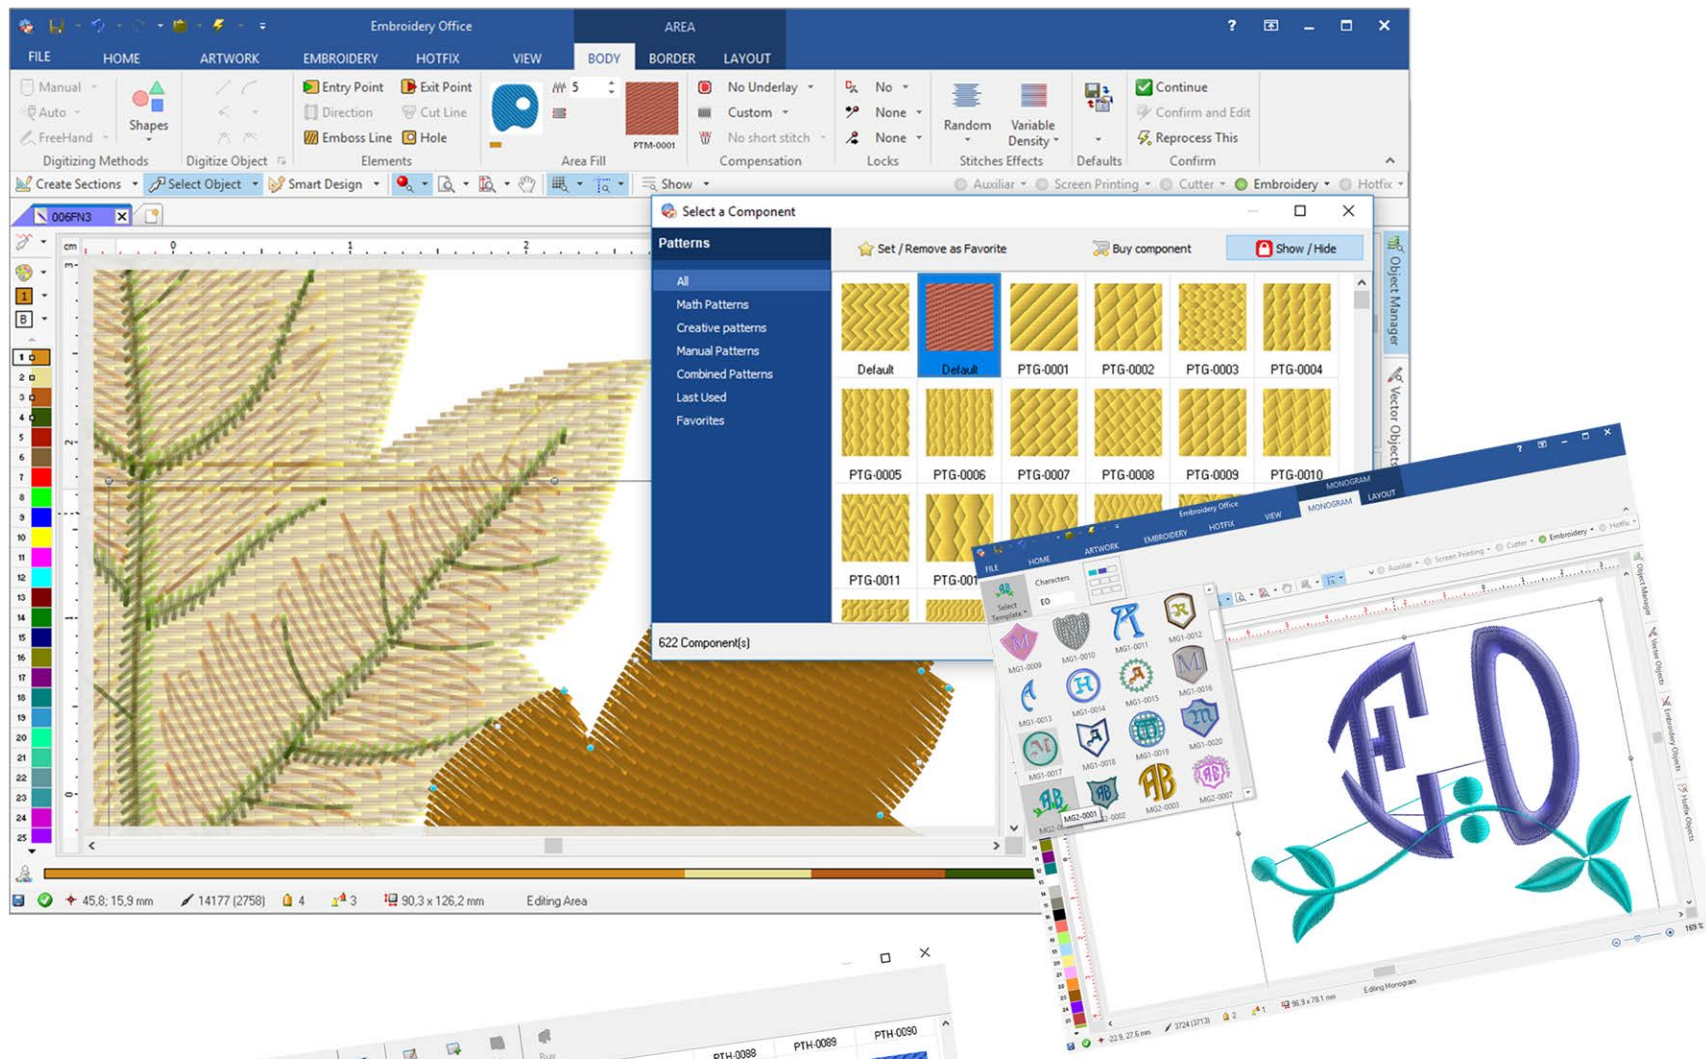

While you can see and edit the most used object properties on the ribbon-bar above the working area; the Object Inspector allows you to adjust the properties in detail to accurately control each part of the design.

FEATURES	D50	D60	D80

Components Library

One of the most productive resources of Embroidery Office are the components.

Examples of components are: stitch patterns, textures, programmable stitches, pre-digitized fonts, etc.

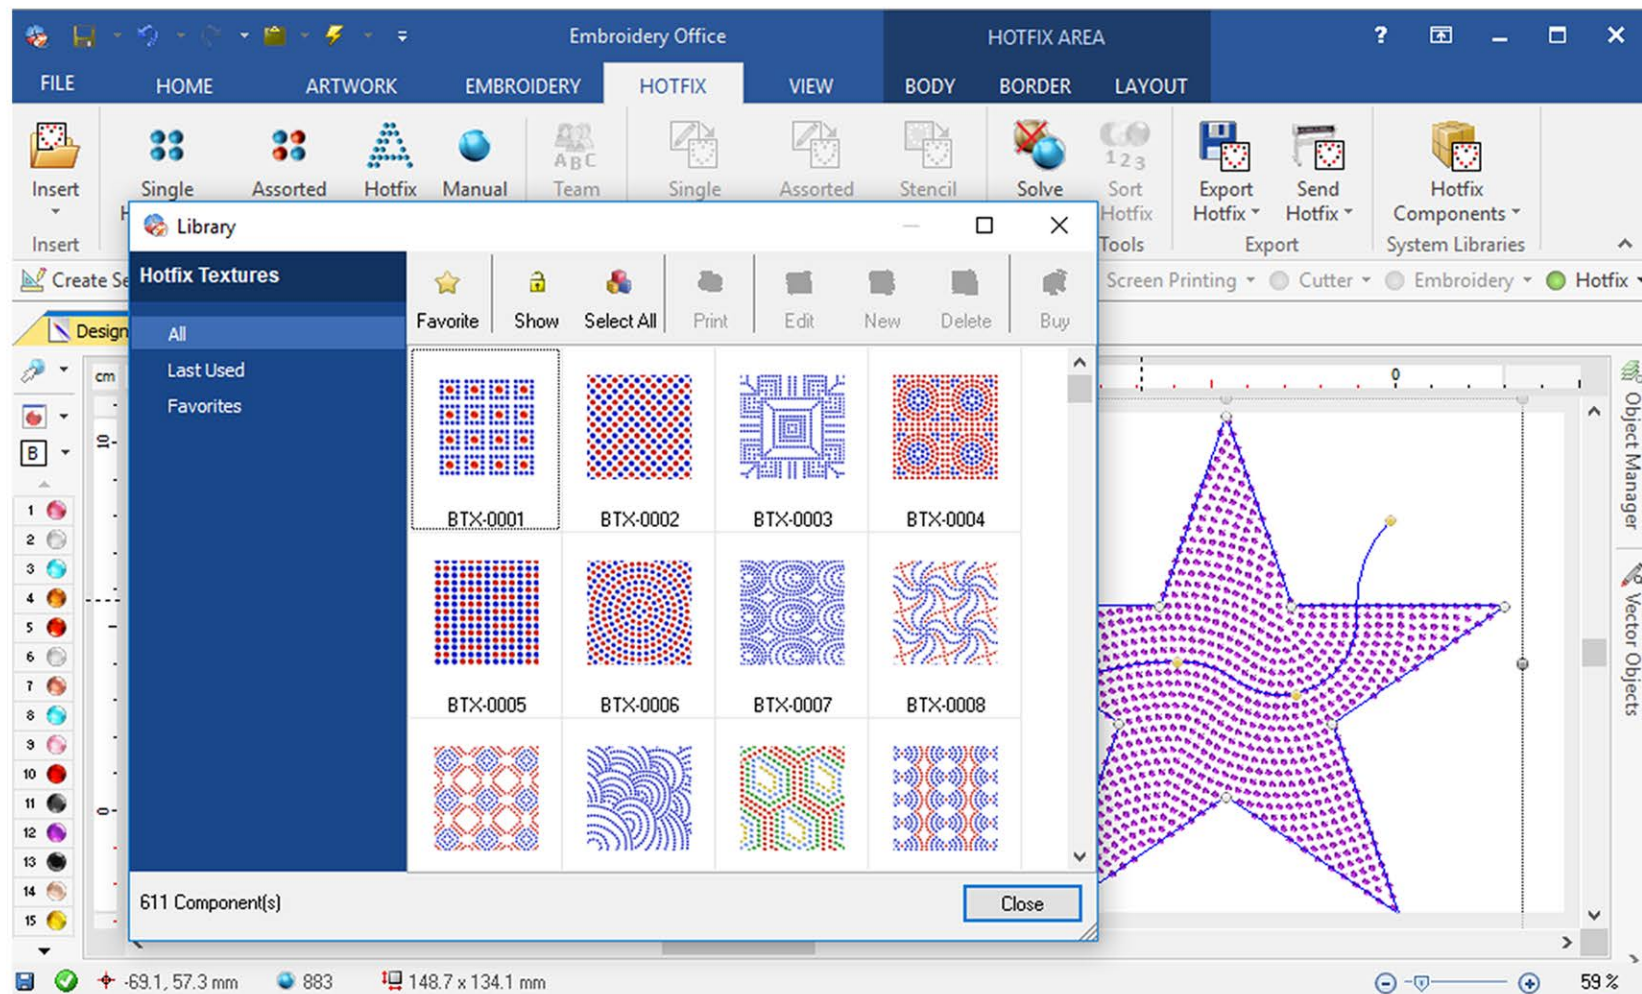

This product offers a wide variety of components. Users can also purchase inexpensive extra components to enlarge the existing library.

According to the software level, Embroidery Office may include some components builders (to create new custom components) and/or some components builders can be purchased optionally as extra features.

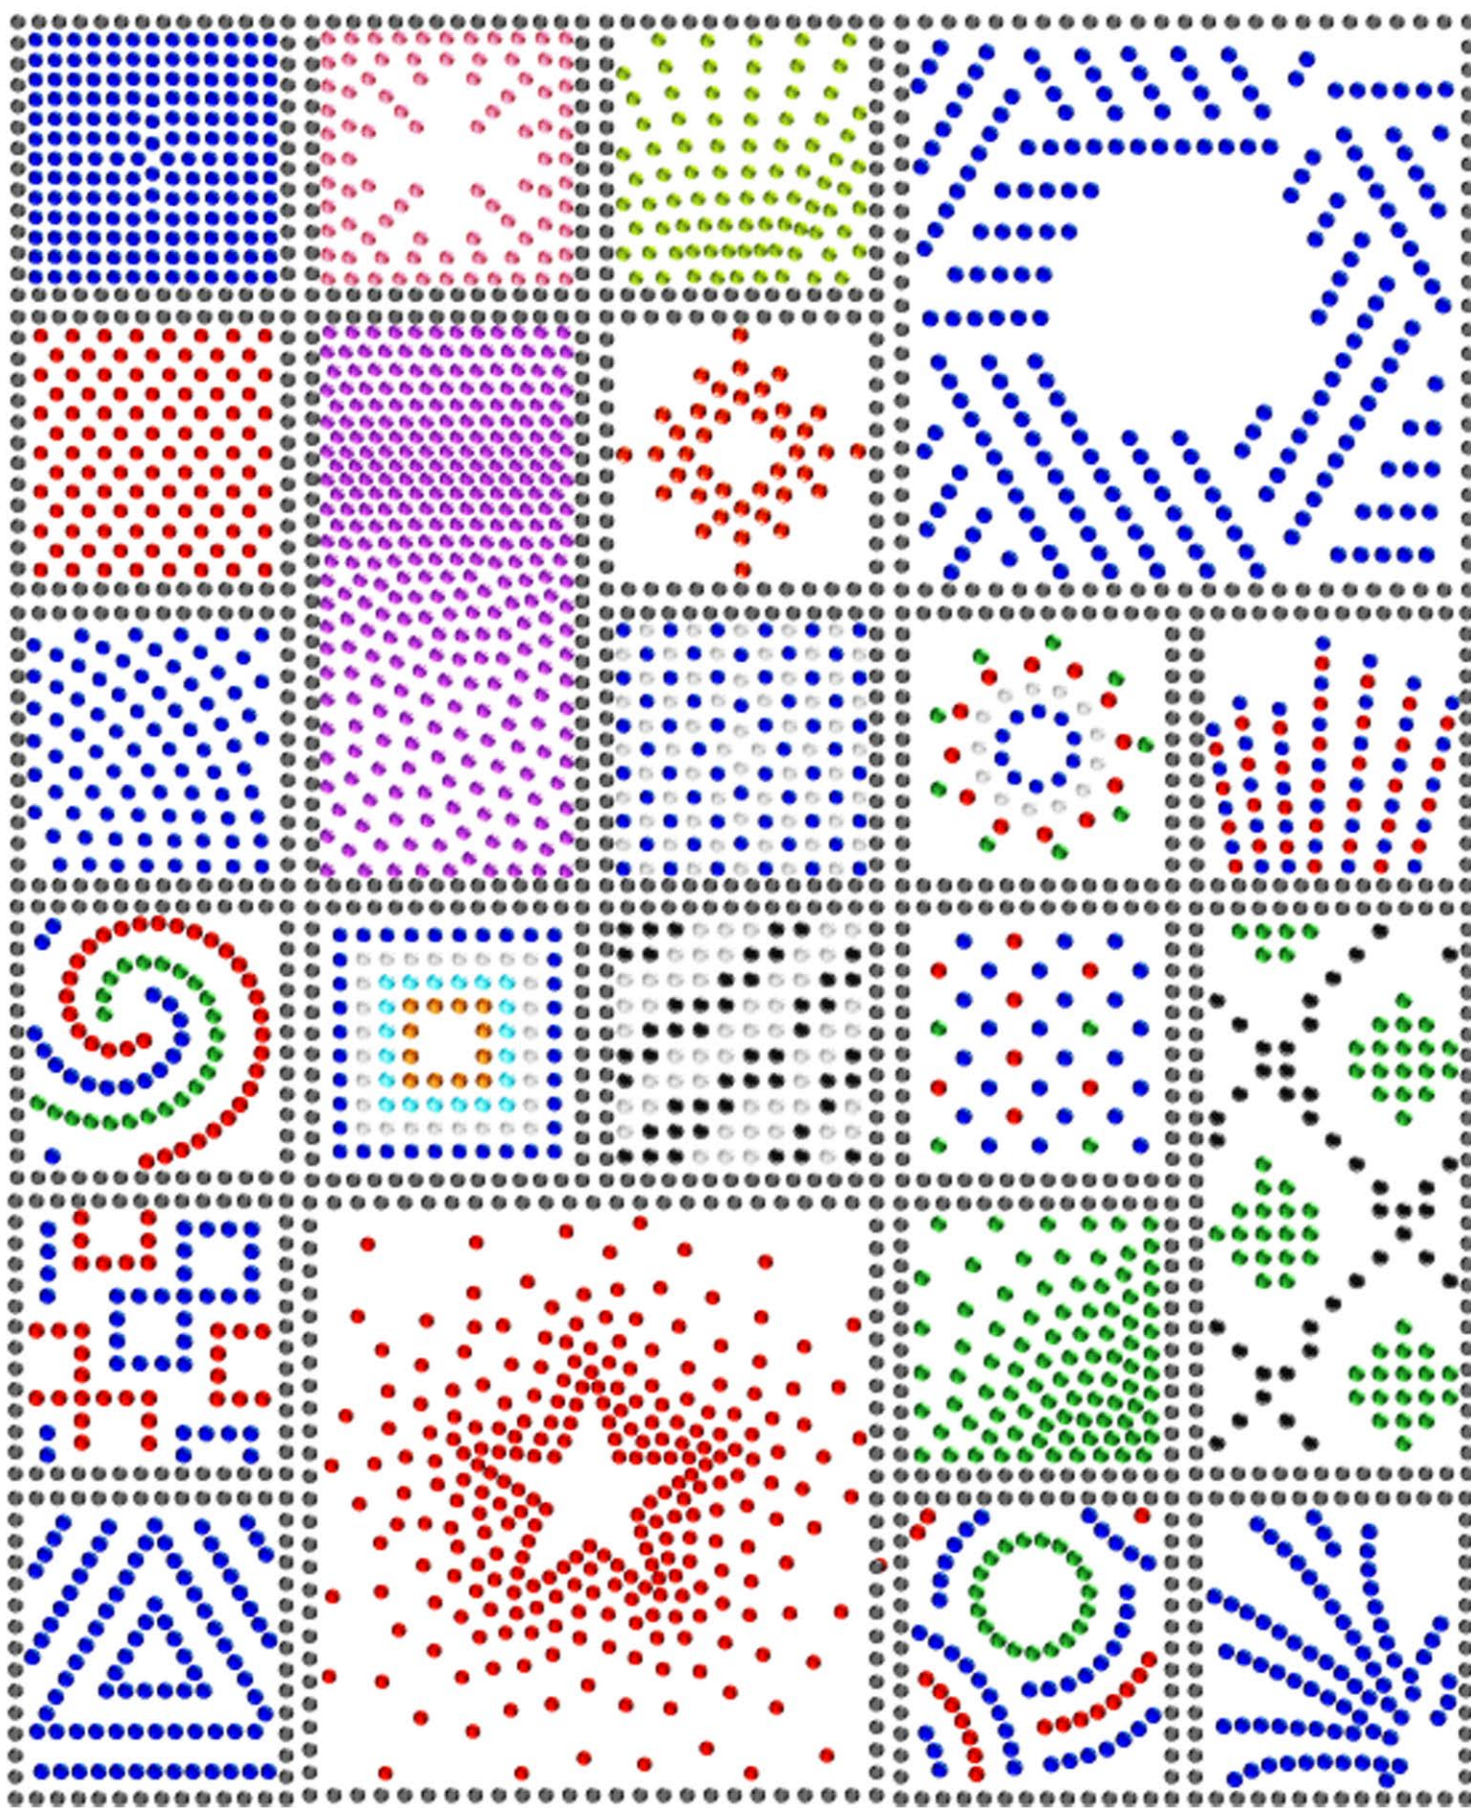

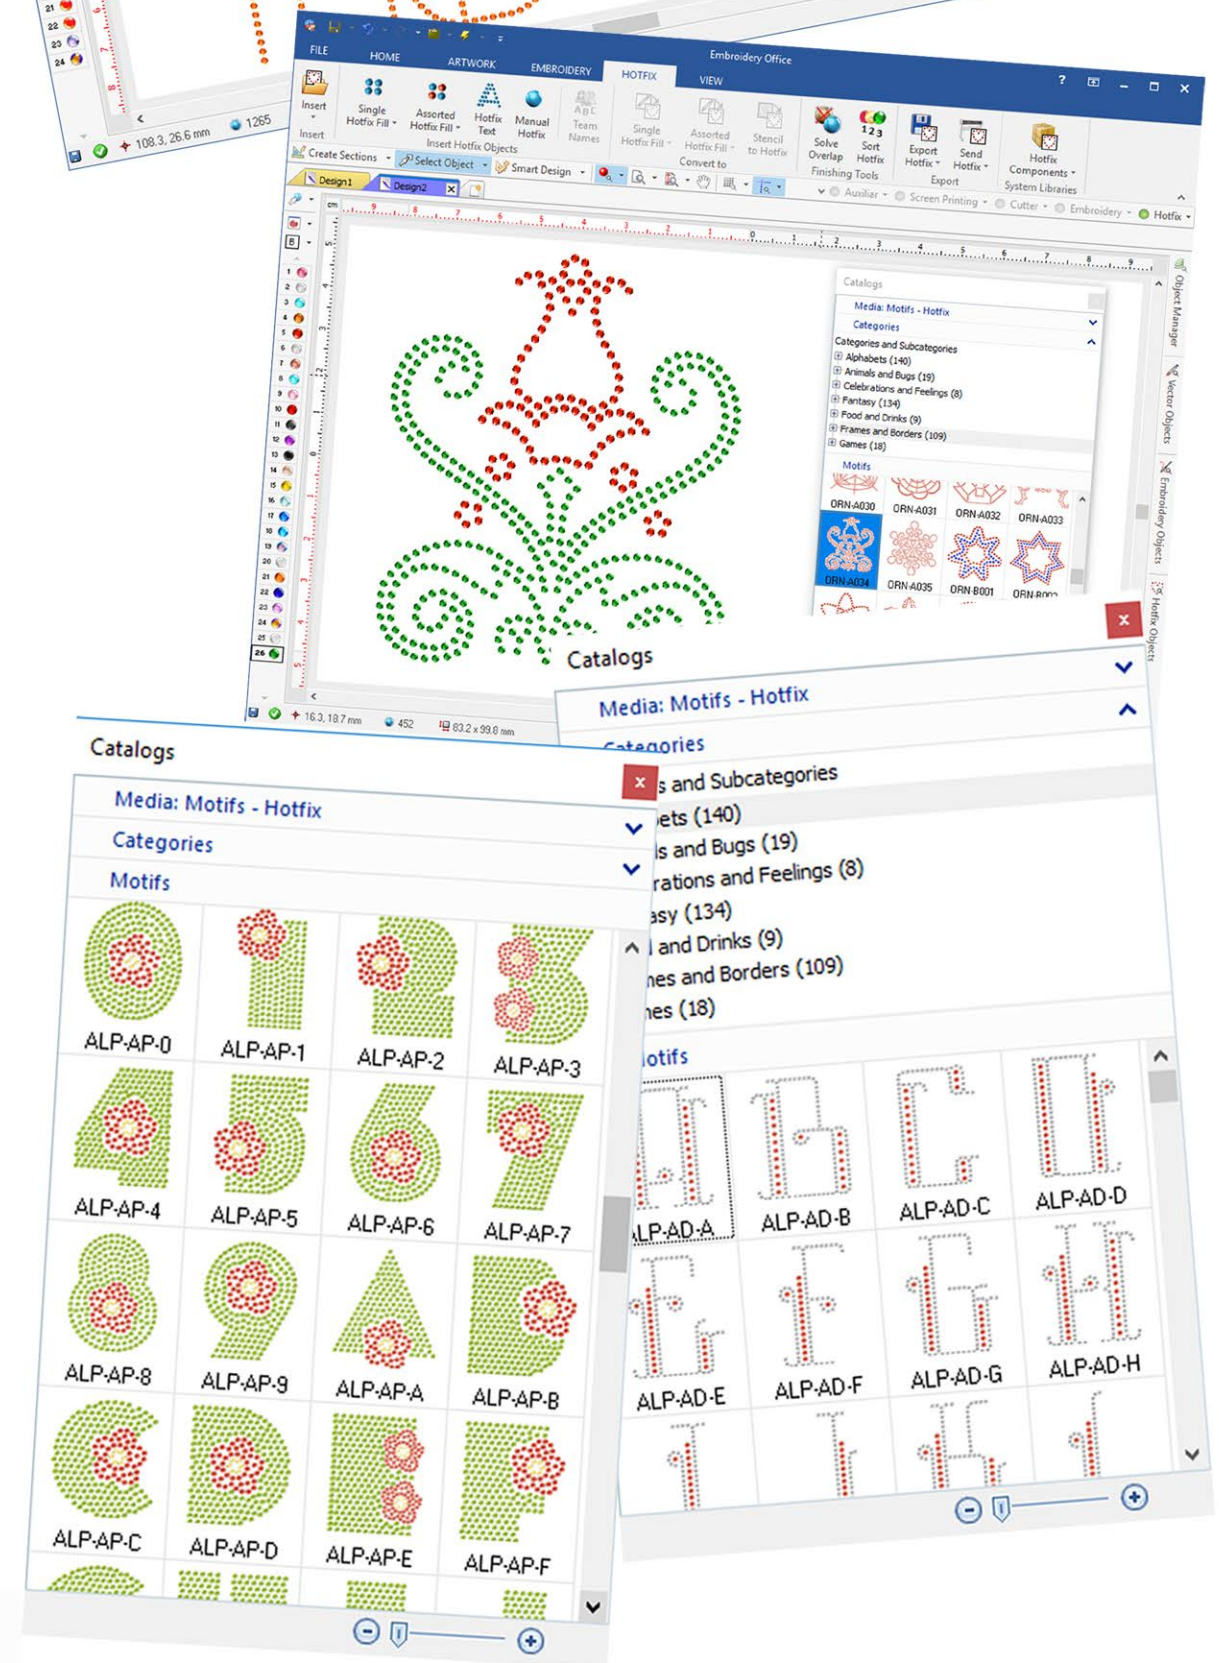

FEATURES	D50	D60	D80
